

DANG NGOC HAI

Front-end Developer

☎ +84 348 263 626 ✉ haingocdev@gmail.com 📍 Hanoi, Vietnam

SUMMARY OF QUALIFICATIONS

- Front-end developer with 4 years of experience designing, developing, and deploying scalable web/mobile applications using Flutter, React Native, React JS, Next-JS. Proven ability to deliver production-ready applications with strong performance, modular architecture, and optimized release workflows.
- Proficient in **state management solutions** such as Bloc/Cubit, Provider, and Riverpod, ensuring scalable and testable application architecture.
- Experienced in CI/CD pipeline collaboration, App Store & Google Play deployment management, and AI-assisted engineering practices to accelerate development cycles.
- Experienced in React state management such as Redux (Thunk, Saga), React Query, React Hooks.
- Proficient with unit testing practices and Agile/Scrum methodologies, ensuring quality and collaboration across development cycles.
- Extensive expertise dealing with databases such as Firebase (Realtime and Firestore), MongoDB, MySQL, and GraphQL.

EDUCATION

FPT Greenwich University

Bachelor of Information Technology (2018 – 2023)

English Proficiency: Equivalent to IELTS 6.5

TECHNICAL SKILLS

- **AI & Engineering Workflow:** Use AI tools to develop Technical Specifications, generate intelligent code, restructure legacy modules, debug, and write Unit Tests to speed up product delivery and increase maintainability.
- **Programming Languages:** Dart, JavaScript, Kotlin, Java, Swift
- **Mobile Development:** Flutter (primary), Android (Kotlin/Java), iOS (Swift)
- **State Management:** Bloc/Cubit, Provider, Riverpod
- **Backend & APIs:** Node.js (Express, Strapi), RESTful APIs, GraphQL
- **Databases:** Firebase (Realtime Database, Firestore), MongoDB, MySQL
- **Tools & IDEs:** Visual Studio Code, Android Studio, Xcode
- **Testing:** Unit Testing, Widget Testing
- **CI/CD & Deployment:** App Store, Google Play, CI/CD pipelines

- **Methodologies:** Agile, Scrum
-

PROFESSIONAL EXPERIENCE

**NETLINE TECHNOLOGY
SOLUTIONS JSC**

Front-end Developer
Jan 2025 – Present

PINETREE SECURITIES

Front-end Developer
June 2023 – Dec 2024

FETCH TECHNOLOGY

Mobile Developer
Oct 2022 – Dec 2023

CUSTOMER PROJECTS

NETLINE TECHNOLOGY SOLUTIONS JSC

1. Corework – Smart Workforce Super App (3/2025 - now)

Description:

A multi-module workforce management application designed following Super App principles, supporting timekeeping, facial recognition, location tracking, reporting, and notification systems.

Responsibilities:

- Designed and developed modular feature-based architecture following Super App principles.
- Implemented timekeeping, reporting, and notification modules.
- Refactored shared components to improve maintainability.
- Optimized API handling and application performance.
- Upload app to App Store and Google Play.

Tech Stack:

- Platforms, Server & Database: Flutter, MySQL.
- Programming Languages: Dart

2. Solas Farm – Multi-Feature E-commerce Platform (1/2025 – 3/2025)

Description:

Multi-feature e-commerce mobile application with membership system, vouchers, payment gateway, and QR-based payments.

Responsibilities:

- Developed core shopping, checkout, and order management flows.
- Integrated payment gateway and VietQR system.
- Implemented Google Vision API for smart product processing.
- Improved performance in product listing and filtering.
- Integrate API form BE
- Upload app to App Store and Google Play

Tech Stack:

- Platforms, Server & Database: Flutter, MySQL.
 - Programming Languages: Dart
-

PINETREE SECURITIES

1. AlphaTrading – Mobile Stock Trading App (6/2023 – 12/2024)

Description: A cross-platform mobile app for stock trading, enabling real-time market data, order placement, and portfolio management.

Responsibilities:

- Mobile development for iOS and Android platforms using React Native
- Refactor code, and optimize performance to ensure app stability and scalability
- Implement new features based on business requirements
- Work with vendors to develop and integrate admin and supporting systems

Tech Stack

- Programming Languages: JavaScript
- Platforms, Server & Database: React Native, ReactJS, Kotlin, MySQL.

2. Pinex-Social Stock Trading Platform (12/2023 – 12/2024)

Description: A social trading platform that combines investment tools with social networking features, allowing users to follow top investors, share strategies, and trade stocks.

- Developed web app using React JS, supporting Real-time feeds and trading functions.
- Built the web platform with Next.js for server-side rendering and optimized performance.

Responsibilities:

- Refactor code and improve performance
- Implement new feature following business requirement.

Tech Stack:

- Programming Languages: JavaScript
 - Platforms, Server & Database: Next-Js, MySQL.
-

FETCH TECHNOLOGY

1. Oddle Eat Customer (7/2023 – 12/2023)

Food delivery platform supporting 1,500+ restaurants.

Responsibilities:

- Developed new scalable features and UI modules.
- Integrated Google Maps and tracking system.
- Optimized API handling and loading performance.
- Worked in Agile environment with international team.
- Set up and maintained CI/CD workflow using Fastlane and Firebase.
- Participated in release management process.

Tech Stack: React Native, ReactJS, MySQL, NodeJs. Graph-SQL

2. Oddle Eats Mobile: Food Delivery (3/2023 – 7/2023)

A full-featured food delivery platform connecting users with restaurants across regions, offering mobile and web ordering, real-time updates, and seamless user experience.

[iOS](#) | [Android](#) | [Web](#)

Responsibilities:

Develop features following design and requirement

Tech Stack: JavaScript, React Native, Node.js

3. LineUp – Team Builder App (10/2022 – 3/2023)

Responsibilities:

- Built interactive UI with drag-and-drop features.
- Integrated Firebase services.
- Refactored codebase to improve maintainability.

Tech Stack: React Native, Node.js

FREELANCE PROJECTS

xYoYo – Fuel & Vehicle Service Platform

- Develop features following design and requirement .
- Integrated backend APIs.

Tech Stack: React Native, Nodejs, MongoDB

OkGo – Event Booking App

- Develop features following design and requirement
- Bug fixing

Tech Stack: React Native, Visual IDE, Xcode, Android Studio

Bluezone Vaccine Reminder

- Refactored legacy code.
- Enhanced feature stability and user experience.

Tech Stack: React Native, MySQL
